## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**Group I:** Claims 1-10 is directed towards a satellite system spot beam coverage configuration classified in class 455, and subclass 427.

**Group II:** Claims 11-16 is directed towards an antenna assembly for communicating with the satellite classified in class 343, and subclass 766.

**Group III:** Claims 17--21 is directed towards a communication port and antenna assembly connected to the communication port classified in class 343, and subclass 702,720.

**Group IV:** Claims 22-30 is directed towards a switch in communication with the satellite classified in class 455, and subclass 12.1

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of groups I , II, III, IV are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention of Group I is directed to a satellite system with spot beam configuration; Groups II, III is directed to a method of method and system of antenna assembly to communicate with the satellite and Group IV is directed towards a switch which is in communication with the satellite. Therefore the four groups are distinct inventions. See MPEP § 806.05(d).

Art Unit: 2618

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group 1 - Group 4 is different, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
